1000 Sheep classified, as per muster; to be known at the Auction Mart on the day of sale, with particulars of cach flock, and names of the Shepherds, and all Settlers, versed and known as distinguished Flock-masters in the colony. These carefully bred Sheep must bring to their recollection the many years of labour and expense spirited proprietors have been at since the arrival of those per Disdam, in 1829; imported purposedly to improve the stock, by throwing in the best blood both from the Escurial and Saxony Flocks. It is natural to suppose that the descendants of that breed at subsequent periods required a further change, relavigorating the constitution of the animal so liable to falling off in shape and unity of proportion. It is with this view that these sheep have been looked after, and it is presumed that the great object is attituted when you produce an animal with firm round ribs, legs are too long, a well set and full chest, broad powerful loin, small bone, graceful figure, and improved weight of fleece.

Lots 5, 6, and 7, have the advantage of frontages to the Minnumurra Fresh Water River, and is land of a superior description.
The Auctioneer respectfully invites the attention of intending purchasers to the above Farms, the fact of their being situated in the beautiful and fertile district of Illawarrs, so well known as the granary of the colony, is a sufficient recommendation, requiring no further comment. A plan of the above may be inspected at the Mart of the Auctioneer.

If these recommendations are worth paying attention to, and the description of the animal is borne out by good practical and experienced judges upon the subject, it only remains for any intending purchaser to refer to the Stock to which these bear contanguinity, and there can be then no doubt as to the reputation the person will arrive at, in the wool market, who has the good luck to become the buyer of them. Towhich Glengarry replied as follows :- "Gentlemen, -I cannot on the present occasion express my feelings as I would wish in answer to your most kind and flattering address; suffice it to say, that I am most heartily gratified by the display of feeling towards me, and although I cannot in truth say I regret returning to my native land, yet, were I again to leave that home, there is no part of Australia to which I would in heart return but to Gipps' Land. I not only think it a most fertile and promising district, I may say the most of any I am acquainted with in the most of any 1 am acquainted with in New South Wales; the settlers in that a collection of Modern Entries or Select Pleadings, by John Tily, Esq. greatest happiness and pleasure in associating with, and although circumstances Dickenson's Office and Duties of a Justice of greatest happiness and pleasure in associating with, and although circumstances forbid my remaining among them, I shall ever feel the warmest interest in their welfure and that of this district. I remain entlemen, yours very truly,

" Æ. R. M'DONNELL." By the foregoing it will be seen, that Gipp's Land, or Port Albert as it is more properly called is going a head. The country, we learn, is getting rapidly filled with settlers principally from the Sydney side. settlers principally from the Sydney side. This fact alone should stir up the enterprising spirit of the Port Phillipians, for it appear spirit of the Fort Finisheaus, for a appears strange that we should allow the Sydney folks to possess themselves of the most available lands in that fertile country. At the time of our latest accounts, there were two vessels taking in stock for Van Die-men's Land, which from the proximity of the harbour, must be a valuable marketable export of the greatest importance to that country. There are at the present moment 1200 head of fat cattle in the neighbourhood, all fit for the butche Labour is scarce, and wages consequently high; thirty men would, we are informed eadily engaged at a fair rate. It is much to be regretted that the project formed some months ago for a n road through the scrub, should have been abandoned by the Port Phil lipians; subscriptions were set on foot and every thing at the time promised well, but ere long the project was abandoned without any just cause being assigned.

Nors.—Public confidence in Ba'main possession being now pretty well sut at reat by public consent, it is hoped no man hereafter will dispute the title he can claim from the hands of any person, who has a right certainly to dispose of whatever portion of his own preperty he chooses.

Indisputable as a property of vast importance to a maritime city, and partaking of such mercantile advantages in strade and intercourse, without being subsidiary to any scale of taxation, certainly this harbour frontage is splendidly suited to boat-builders, and all persons prosperously succeeding in life, like Messra. Luke, Howard, Bullivant, Bowman, Browa, Korff, &c., who never would have invested so large a capital in a ship-building concern, unless the most extensive demands were met by immediate local means for performing their orders, and compassing despatch on a most economical, practical, and satisfactory principle.

More. In this sale, the Public are not constrained to believe more than they can see any day they choose. The immense rapidity which has whirled the Surry Hills into repute and notoriety unparalleled, discovers, at the same time, its redundancy of population, and local advantages, more and more every day. If therefore news-comers be a little timid at first going cff, in buying metropolitan property like this, (through the means of an advertisement only) they have only to ask themselves, "How it is that others have done so?" And the answer will pretty evidently show, that it is not so much out of belief in the person who recommends; but for the sake of the property itself, whereby they get a monstrous; siap-up return for their invested capital. Independent even of these results, this scale presents to the Speculator and Builder, sound reasons for purchasing; looking at the area each lot contains, and the depths especially given to the individual who may want to build his cottage off the town pavement, good room for his house, with audicirnt left for detached premises, an attached garden and ground.
